

# Maxwell Christ

## Full Stack Web Developer | Software Engineer

Buffalo, NY | 716-697-3243 | [mhchrist22@gmail.com](mailto:mhchrist22@gmail.com) | [GitHub](#) | [LinkedIn](#)

### TECHNICAL SKILLS

---

**Front End:** Ant Design, Axios, Context API, CSS, Cypress, Figma, HTML, LESS, JavaScript, Jest, React.js, Redux

**Back End:** Express, Git CLI, GitHub, Heroku, HTTPie, Node.js, Postman, SQL, SQLite, Vercel

**Additional:** Debugging, Deployment, Git, Responsive Design, Single Page Applications, Testing, Jira, Agile, Algorithms

### PROJECTS

---

**Human Rights First - Asylum Report Generator**, *Frontend Developer* - React | Redux | CSS | HTML | Figma | Jest | LESS [GitHub](#)

- Collaborated with national nonprofit stakeholders to create desired UX/UI designs using Figma
- Implemented self-hosted fonts provided by stakeholders along with assets from style guide by creating global variables via CSS and LESS
- Created unit tests, using Jest, for search bar fetching mock API, while maintaining Ant Design layout
- Coordinated with full stack development team to create Redux store and subsequently translate to end user graphical interface

**Authentication and authorization using JSON Web Tokens (JWT)**, *Backend Developer* - SQLite | Node | Express [GitHub](#)

- Produced custom middleware with Express to determine user access and implement restrictions from user input
- Prepared endpoints that hashed user's password before storing in SQLite managed database
- Validated user's password with hashed password saved and built middleware to confirm correct credentials. A JWT was generated for authenticated users and was verified upon each client request

**React Grid**, *Frontend Developer* - React | Hooks | Axios | CSS | HTML [GitHub](#)

- Configured one coordinate of a grid to be able to move throughout the available coordinates on the grid using both functional and class components
- Implemented flatMap array method to update a slice of state involving a matrix which represented the grid
- Created event handlers to each button triggering a component that updated the user's position within the matrix or alerted the user of an invalid move using another slice of state

### EXPERIENCE

---

**KeyBank, Buffalo, NY - Mortgage Processor** 2020 - 2021

- Consulted with borrowers in finding the best loan products for their needs using Oracle application processing tools
- Ensured the mortgage loan application was completed correctly by explaining loan products or errors accurately
- Prepared and submitted detailed loan packages to the underwriting department for approval or denial
- Identified and resolved application errors and collaborated with cross-functional teams to facilitate loan completion

**KeyBank, Buffalo, NY - Indirect Lending Senior Specialist** 2018 - 2020

- Processed auto loans by ensuring loan documents were within certain approval thresholds
- Exceeded daily and monthly quotas within 6 months
- Mentored approximately 10+ team members, managed and trained on loan documentation compliance and standard guidelines to ensure quality performance and quota accomplishments were met

**KeyBank, Buffalo, NY - Mortgage Servicing Specialist** 2017 - 2018

- Performed accurate and timely loan transactions by inputting customer's daily payments via ACH reports
- Completed requests from customers and other office team members to obtain, provide, or correct specified data

### EDUCATION

---

**BloomTech (Lambda School)**, *Current Student, Full Time Program, Full Stack Web Development*

2022 - Current

**Niagara University**, *Bachelor of Science in Business Marketing with minor in Biochemistry*

2009 - 2013
